

## Oral/Enteral Dispensers *by NeoMed, Inc.*

**FROM THE CREATOR OF THE FIRST ENTERAL SAFETY SYSTEM (ESS),** NeoMed, Inc. is proud to announce a new line of Oral Dispensers designed to be:

**COMPATIBLE** - Our NeoMed Oral Dispensers are designed to work seamlessly with most new or existing pumps on the market **WITHOUT** introducing flow **VARIANCES** common with other Oral Dispensers.

**SAFE** - Our NeoMed Oral Dispensers are manufactured as single piece molded barrels that do not rely on adapters to create an oral tip.

**COMPLIANT** - Our NeoMed Oral Dispensers comply with the Joint Commission Patient Safety Goals with design features that prevent connectivity to luer devices.

**COORDINATED** - Our NeoMed Oral Dispensers feature Orange lettering and gradient markings that coordinate with NeoMed orange extension sets and feeding tubes.

**ECONOMICAL** - Our NeoMed Oral Dispensers are offered at a very economical cost as compared to other Oral Dispensers or luer syringes with attached adapters.

**TRACEABLE** - Our Oral Dispensers feature a unique silkscreen 2-D bar code that is used in conjunction with the NeoMed SafeBaby™ breast milk tracking system.

**SECURE - Plugged Tip Cap** - Each dispenser is individually packaged containing a "plugged" tip cap designed to safely seal contents for storage and warming. Our tip caps are designed to **self-right** on any surface, allowing the clinician to quickly and easily secure the tip on our dispensers.

**PRECISE** - The NeoMed off-set tip is specifically designed to deliver colostrum first to the patient.

**Please see back for ordering information**

Orange signals Enteral Safety.  
Orange on the barrels signals authentic NeoMed.

## Product List

Product Code	Product Description	Quantity
<b>Individually Packaged Dispensers (Pump Compatible)</b>		
NM-S1EO	Individually Packaged Oral / Enteral Dispensers 1ml	200/bx
NM-S3EO	Individually Packaged Oral / Enteral Dispensers 3ml	200/bx
