

Umbilical Catheters/Kits *by NeoMed, Inc.*

NEOMED INTRODUCES OUR NEW LINE OF SINGLE AND DUAL LUMEN UMBILICAL VESSEL CATHETERS.

Together with our innovative Catheterization Tray, NeoMed offers a full line of Silicone Umbilical Catheters in both single lumen and dual lumen designs. Silicone has proven to be a safe and effective material with properties that help reduce risks common with catheterization of blood vessels.

Features

1. Silicone material is well known as a safe and effective catheter material.
2. Flexible silicone material reduces the risk of "mis-tracking" into other vessels during insertion.
3. Our UAC/UVC products are manufactured with a high quality 3-way stopcock.
4. Dual Lumen UAC/UVC maintain lumens to the catheter tip.
